

**NAVAL REACTORS DOE ORDER IMPLEMENTATION BULLETIN 410.1-114,
CENTRAL TECHNICAL AUTHORITY, REVISION 0**

Consistent with the Naval Nuclear Propulsion Program (NNPP) overall concept of operations, the following provides specific implementation guidance for DOE Order 410.1 for those activities under the Director's cognizance. This guidance takes precedence over DOE Order 410.1 and guidance found in other related DOE documents.

1. For the NNPP, the Director, NNPP is the Central Technical Authority (CTA).
2. For the NNPP, the Director, Reactor Safety and Analysis, NNPP is the Chief of Nuclear Safety (CNS).
3. Naval Reactors invokes applicable Regulations and Directives listed in DOE Order 410.1 by Prime Contract and Naval Reactors DOE Order Implementation Bulletins. Requests for waivers and exemptions to specific requirements of DOE Order 410.1 as implemented by this IB will be submitted to NR headquarters for review and approval. The cognizant Naval Reactors Headquarters section and Field Office element will retain records of approved exemptions.
4. DOE Order 410.1 delineates requirements for CTA and CNS review of new DOE Directives and proposed revisions to existing DOE Directives. Naval Reactors Headquarters participates in these reviews via the DOE RevCom system. Naval Reactors will solicit Prime Contractor comments on proposed new DOE Directives or revisions to existing DOE Directives as appropriate.
5. In place of processes specified in DOE Order 410.1, NNPP elements shall continue to use processes required by the applicable NNPP directives and manuals.
6. Oversight and evaluation of the Prime Contractors' duties under DOE Order 410.1 will be conducted by the Naval Reactors Laboratory Field Office (NRLFO) with additional oversight provided by NR Headquarters.
